ProPlay[®]-MP 12: THE CUSHIONING PAD FOR YOUR MULTI-GAME AND PLAY AREA

Schmitz Foam Products added a new ProPlay version to its rich product portfolio. ProPlay-MP12 is 12 mm thick and very light weight.

It is delivered in the recognizable puzzle shape enabling a quick and easy installation. An economical pad solution for those play areas in need of a comfortable and cushioning pad with the guarantee of many playing hours, all year round.

ProPlay-MP12 combines all knowledge, expertise and vertical drainage of the known ProPlay shock pad.

TRY PROPLAY-MP12 AND GET:

1. A pad specifically developed for multi-game and play areas below 2500 m²
2. A 12 mm thick pad which is rather thin and light weight
3. A pad with its recognizable puzzle shape which enables an easy installation
4. Interlocking panels with no need for glue or tape to fix them
5. An economic solution enabling relatively low transportation costs
6. Excellent vertical drainage capacity that you may expect from ProPlay

WE ARE SCHMITZ FOAM PRODUCTS. WE ARE PROPLAY.

The Schmitz company is a fourth generation family business that was established in 1935 in the Netherlands. Foam has always played an important role in our business. The first ProPlay was produced in the early 90s. It is the only shock pad that combines top-performance with superior drainage capability. The key focus of Schmitz Foam Products lies on combining sports performance and player safety for artificial grass systems.

**FOAM RESIDUES
GET A PURPOSE**

MADE FROM TOP-QUALITY FOAM

ProPlay is made of closed-cell crosslinked polyethylene foams (XPE) that were originally produced for a different purpose in various industries where quality and product performance is key.

Schmitz Foam Products combines these foams with extensive knowledge about the material, stringent quality monitoring systems and well-defined production processes into a shock pad that delivers the required sports performance, player safety and field drainage.

PROPLAY: THE MOST SUSTAINABLE SHOCK PAD AVAILABLE

When a ProPlay shock pad is no longer needed for its original application, the material can always be reused in another sports field or playground.

When it is not possible to find a new use for the original shock pad it can be returned to Schmitz Foam Products for recycling to a brand new pad for a variety of applications. A nice circular process of which we are proud!
